VOL 10

Thelonious™

The Great American AI Act

A comprehensive US bill proposing a regulatory framework for 'frontier AI models.' It mandates transparency, risk assessments, and third-party audits for large developers.

It establishes a Center for AI Standards and Innovation to develop guidelines and oversee compliance, while also addressing workforce impacts, cybersecurity, R&D, and federal preemption.

If this briefing saved you 20 minutes of research today, imagine what the full platform does.

We'd love to show you!

New York Stealth Crawler Prohibition Act

This bill requires software crawlers, including AI agents, that access 'covered news sources' to disclose their identity and purpose.

It prohibits 'stealth crawlers' that fail to provide this disclosure, particularly if they cause harm or economic damage to the news source.

Canada's New National AI Strategy

A national strategy outlining Canada's plan to leverage AI for economic and social benefit. It focuses on six pillars: protecting citizens, building skills, driving AI adoption across the economy, establishing sovereign compute infrastructure, scaling Canadian AI companies, and forming trusted international partnerships.

Jess Asato v. xAI

UK Member of Parliament Jess Asato alleges that xAI's Grok chatbot generated fake, sexualized images of her without consent, in violation of the Data Protection Act and constituting a misuse of her private information. Brought under the Data Protection Act and for the tortious misuse of private information, the action seeks damages and an injunction against further illegal conduct.

American Federation of Musicians v. WMG & UMG

The American Federation of Musicians (AFM) alleges that Universal and Warner Music Group breached their collective bargaining agreement by failing to share proceeds from settlements and licensing deals with AI companies Suno and Udio. The AFM contends that using members' recordings to train AI constitutes a "new use" under their agreement, which contractually entitles the musicians to compensation.
